

Energy Management

There are many details involved in efficiently running a sustainable energy asset. We provide the technical expertise you need to optimize your energy assets in the marketplace.

We know sustainable energy. Make our expertise your advantage.

What Sets Us Apart

Sustainable Energy Marketing

Experience navigating and dispatching renewable power into the ERCOT, PJM, SPP, MISO, IESO, CAISO and NYISO markets.

Centralized Control

State-of-the-art 24/7 primary and off-site backup control centers provide outage coordination and real-time and day-ahead market coverage.

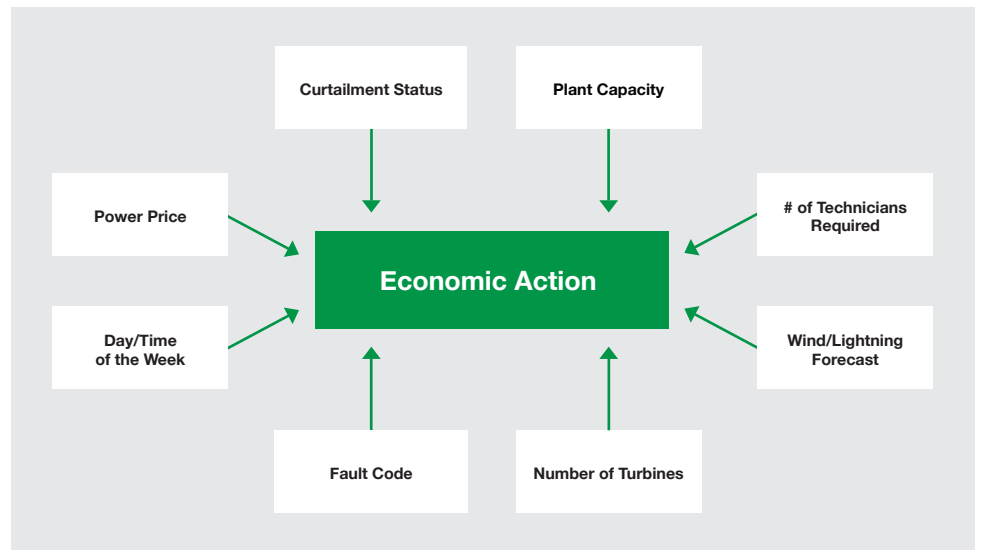

Flexible Programs

Tailored solutions defined to meet your goals and bottom line for varying degrees of project complexity.

Providing Value to Operations

Cost Analysis Program

With both Operations and Markets teams housed in the same control center, we can more efficiently address asset needs. Through our internally developed Cost Analysis Program, we make data-driven decisions based on both economic factors and safety considerations—minimizing risk and cost.

What We Offer

Market Operations

- Market participation submission
- RARF or other technical data submissions
- Communications testing
- Reactive power testing where required
- Redundant ICCP connections to ISOs

Required Real-time Scheduling

- Web portal submissions
- Outage coordination

Optional Scheduling

- Day-ahead market offers
- Congestion mitigation tools
- Energy bids to offset hedges
- Operational notifications
- Transmission scheduling to move energy between markets
- Ancillary services and capacity sales

Settlements

- Market settlements
- Daily meter checkout and daily meter submission
- FERC EQR filing
- Third-party settlements
- REC settlements

Trading

- Term Power Sales
- REC Sales

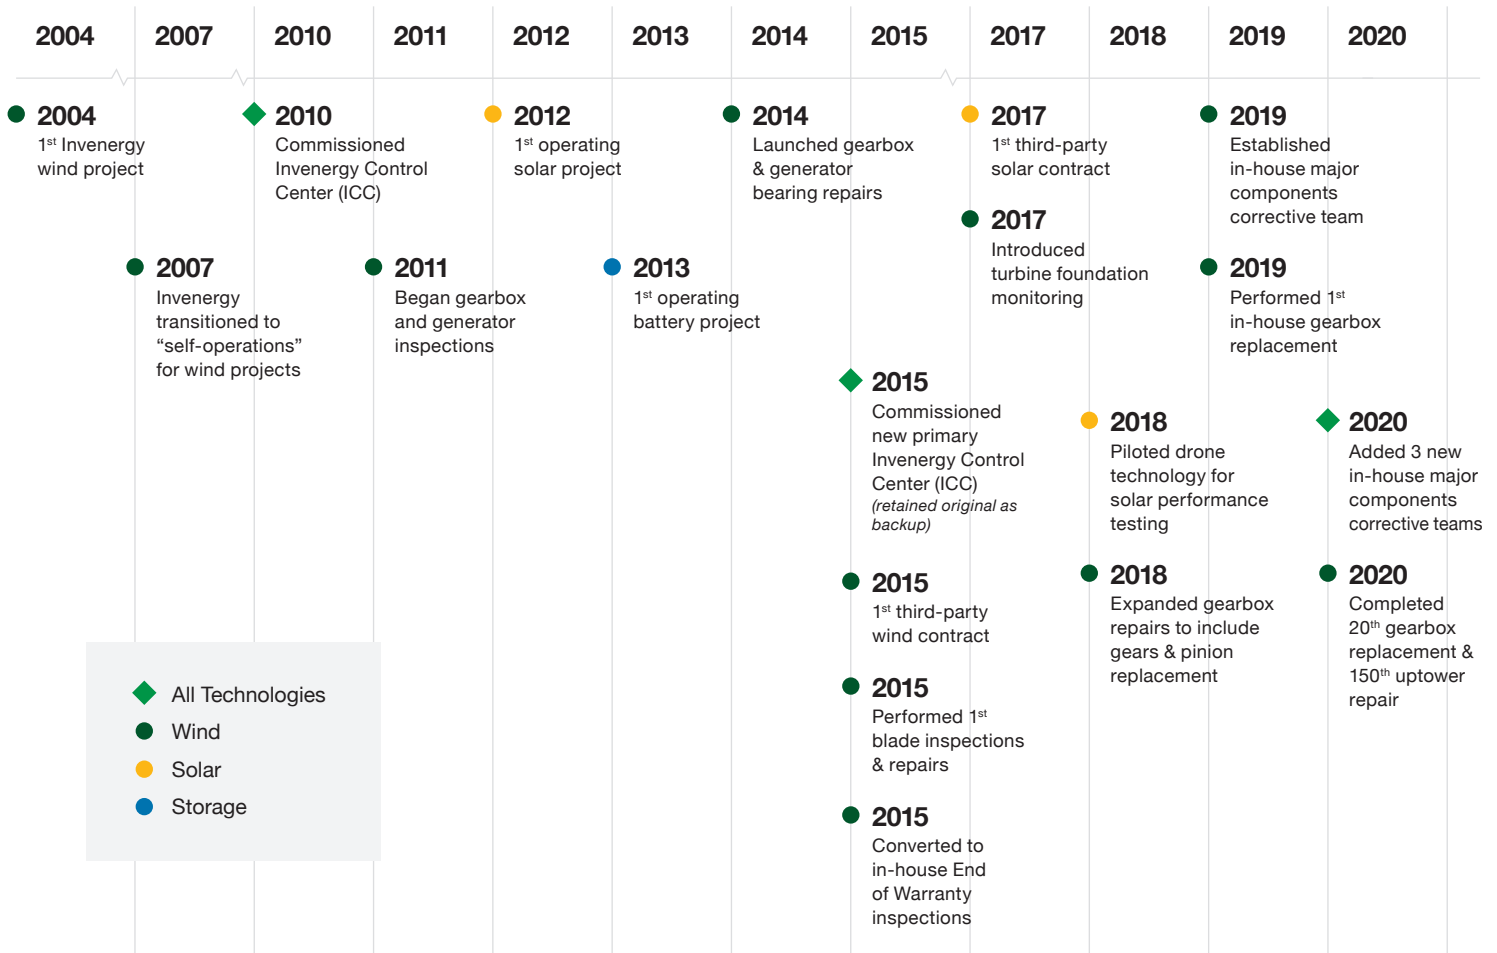

Invenergy Services

Operate with excellence.

Invenergy Services provides sustainable energy asset owners end-to-end solutions for every aspect of asset management, operations and performance analysis. Invenergy Services currently manages more than 10,000 megawatts of wind, solar, natural gas and battery storage facilities, including 1,500 megawatts owned by third-parties. With on-site technicians, a state-of-the-art 24/7 Invenergy Control Center, and a progressive safety culture, Invenergy Services helps customers operate with excellence.

Invenergy Services Timeline

About Invenergy

We move projects from the drawing board to reality.

Invenergy is a leading privately held global developer and operator of sustainable energy solutions. Powered by decades of entrepreneurial experience and unparalleled execution, we solve the energy challenges facing our customers and our communities. We are innovators building a sustainable world.
